

Above: Wrong shapes of Ellipses. **Below:** Right shapes of Ellipses

1. Print this page and copy the ellipses on a transparent sheet of paper
2. Take a new sheet of drawing paper. Draw the left and right side verticals, draw an exact midway vertical. Now draw 6 ellipses using a horizontal. Check ellipses by turning your page upside down. Each quadrant should have the same size.
3. Make another two of these kind of rows of ellipses but make them very shallow and very wide.
4. Submit your Exercises and wait for instructions.
